

Incident Report

BookNest backend database connectivity failure causing application degradation and repeated health-check failures

CRITICAL

RESOLVED

INCIDENT ID 11111111-1111-4111-8111-111111111111	GENERATED 2026-10-01T18:45:00.000Z
DETECTED 2026-10-01T18:28:54.422Z	AFFECTED SERVICES booknest-backend, booknest-frontend

1. Executive Summary

The BookNest backend lost database connectivity. Backend request processing degraded and frontend health checks failed while the dependency remained unavailable.

Item	Confirmed report data
What happened	The BookNest backend lost database connectivity. Backend request processing degraded and frontend health checks failed while the dependency remained unavailable.
Affected services	booknest-backend, booknest-frontend
Current status	RESOLVED
Duration	697000 ms (0h 11m 37s)
Main detected symptom	APPLICATION_DEPENDENCY_FAILURE
Confirmed root cause	The backend could not establish a database connection.

Facts above come from the normalized incident record. Correlated signals are evidence, not proof of causation.

2. Key Metrics

3. Anomaly Analysis

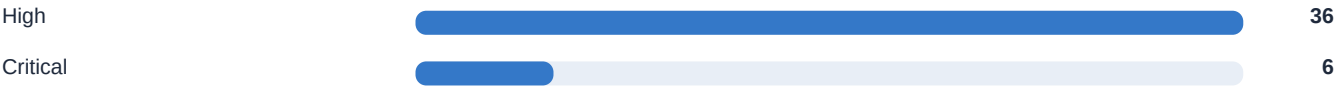

By classification

By source

By severity

By status

4. CPU and Memory at Incident Detection

Resource / observed	CPU	Memory	Limits / requests
booknest-backend / booknest-backend-7cc6746dc8-c6pqk / backend	0.42 cores / 42%	437 MiB / 85.34%	CPU: 0.25 req, 1 limit Memory: 256 MiB req, 512 MiB limit

5. Service Health

Service health data was not provided for this incident.

6. Root-Cause and Code Analysis

Confirmed root cause

The backend could not establish a database connection.

Suspected cause

Not available.

Supporting evidence

42 recorded timeline signal(s) are retained in the timeline and technical appendix.

Code analysis findings

No code analysis findings were reported.

Unknown or unavailable information

Suspected cause, Code analysis findings

7. Remediation Summary

1. Suggested actions

Action	Description	Recorded at
Restore database connectivity	Verify database availability, credentials, DNS, and network policy before restarting dependent workloads.	Not available

2. Executed actions

None recorded.

3. Verification results

Verification results were not provided.

4. Outstanding actions

Outstanding actions were not provided.

8. Incident Timeline
